RECEIVED

NOV 08 2002

TECH CENTER 1600/2900

Commissioner for Patents
Washington, D.C. 20231

Sir:

In reply to the Official Action dated June 5, 2002, applicants request that the following new versions of the claims be entered into the record in the above-identified application. Examiner Helms kindly has indicated that the finality of the present action would not bar the entry of claim amendments into the record.

IN THE CLAIMS

Please cancel claims 39, 42, 45, 48, and 50-52 and enter the following new versions of pending claims into the record.

1. (Twice Amended) A method of making a glycosylated antibody having a reactive ketone group on the glycosylated site, comprising:

Σ¹ expressing SP2/0 cells that are transfected with a vector encoding an antibody having one or more N-glycosylation sites in the CH1 or V_K domain in a culture medium comprising a ketone derivative of a saccharide or biosynthetic saccharide precursor, so that they produce a glycosylated antibody having a reactive ketone group on the glycosylated site.

Σ² 6. (Twice Amended) A method of making a glycosylated antigen-binding antibody fragment having a reactive ketone group on the glycosylated site comprising:
